Excellent work and thanks to all who participated. Once we have a proposed schedule I suggest the management folks get back together to review this work and provide any necessary guidance to the effort. I like the idea of creating the "uncertainty" categories, and I think we'll need to better zero in on what that translates to in support of the DQO's.

Subject: Meeting notes from 10/8 Sampling Methodology Workgroup

Thanks to all for a very collegial and productive discussion yesterday! Special thanks to Nicole and crew for providing us with a robust sampling plan to fuel our discussion, and to Kristine for volunteering to take the lead on this effort during my absence.

As you'll see from the notes, we covered a lot of ground but also have a bit of work to do. Since we did not talk about a timetable at the meeting, I suggest that Kristine propose a schedule and communicate with the group about next steps.

Thanks - see you at the end of the month.

Karen
